**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

I am a customer of Sonic, a Santa Rosa, California based ISP. I chose Sonic because of their superior Internet and phone services compared to the competition of Xfinity and AT&T. By superior, I mean cheaper and faster.

Currently, for example, AT&T's comparable service is double the price of Sonic. Xfinity's advertised services are 10x slower, and more expensive. Both of these prices are dependent on bundling other services I don't need, making the price comparison even more ridiculous.

We originally became a customer of Sonic using old-style DSL over copper phone lines, so were really happy they were able to invest in building a fiber network in our neighborhood.

Without Sonic's access to unbundled copper and inter-city fiber provided for in existing regulations, then MY consumer choices would be limited to inferior service and higher prices. There would most definitely be a 'material affect' to me directly if this was to change.
